**Duke Forge, Durham, United States** | *May 2019 - Aug 2019*

- Examined the link between social determinants and risk prediction for hospital admissions, and which assessed whether social determinants affect that risk in a systematic way. [\[Link\]](#)
- Applied methods of machine learning, risk prediction, and assessment of classification bias.
- Programed an interactive dashboard using Plotly (Dash) in order to explore classification bias on different variables.
- Presented results to different stakeholders (researchers, physicians and hospital managers) and maintained dialogue to inform the direction of our analysis.
